We are pleased to introduce our door modification service in British Columbia, Canada

HS Door has worked hard to develop an efficient and modern fire/entry door manufacturing facility. Using state-of-the-art technology and the latest computer-aided design techniques, we can ensure that all of our products are produced to the high industrial standards. Quality assurance is the vein that runs through all of our processes, pushing us to deliver a product that is unrivaled in both quality and affordability.

Quality & efficient door modification

We provide a door modification service that utilizes the facilities and skills of our staff. Our ongoing goals are to consistently improve our production efficiency and pass savings on to our customers. What's more, all of our products and services are fully warranted against the unlikely event of defect or breakdown.
